

CAPT. MOHD NAIM BIN FADZIL

Having been involved in maritime related research , my research interest varied whilst still encompassing matters relating to the merchant ships activities, maritime safety and security, maritime training matters and logistic managements . Notable amongst those are human factors issues for shipping, marine pollutions due to the marine transportation in the Strait of Malacca. All of these focus mainly on the legal perspective and impact of regulatory changes which leads me to being involved with the International Maritime Organization.

Principal Teaching Fellow (KA13)

Master Mariner (1ST Class – FG), Master in Management – Education Mgmt (UPM). CMILT, APFSNM

+ (609) 668 3738
