

## CAPT. NOOR APANDI BIN OSNIN

Having been involved in maritime policy research on behalf of the government of Malaysia for almost a decade, my research interest varied whilst still encompassing matters relating to the oceans. Notable amongst those are human resource issues for shipping, nuclear transport in the Strait of Malacca, Malaysian palm oil export concerns and ship security. All of these focuses mainly on the legal perspective and impact of regulatory changes which leads me to being involved with the International Maritime Organisation. Presently, I am keen on assisting marine scientific research that are primarily doing work on establishing the health of the oceans. Most of which involved diving to the depths to gather data and samples.

Principal Teaching Fellow (KA13)

MSc. in Marine Policy (Cardiff Business School, University of Wales, UK),  
Master Mariner FG (MARDEP, Malaysia).

+ (609) 668 3735
